

INSTRUCTIONS

- Tape a piece of standard computer paper to the vehicle as shown in image 1, 2 and 3
- Take a 90 degree / perpendicular photo of the vehicle as shown in image A, B and C (make sure you get the entire vehicle or object in the shot.)
- Repeat the process for both sides, back, front, or any other angled surfaces or sides of the vehicle or object that you want decals to be placed on.
- Email photos to: bakersfielddecals@gmail.com, then give us a call!

NOTES

- The piece of paper must be flat in the image. Use multiple pieces of tape if the paper is flying away or not laying flat.
- We use the paper to gain the dimensions of the vehicle or object in the photo.
- The photo must not be angled at all, make sure you are standing square with the vehicle or object before taking the photo.
- You can use one piece of paper to do this, just move it for each photo.
- Make sure the photo is not blurry, and you are not too far away from the car.

THINGS YOU NEED

MAKE THE CAR LOOK LIKE THIS IN THE PHOTO

HOW TO TAKE PHOTO
